Customer Reviews

...or it might not. I wrote a review for this book some months ago (see below for the original) promising to come back and give the book a full 5 stars if after trying the techniques described in it I found them to be effective. I have not found them to be effective. In fact, nothing that I used the "5 Easy Steps" for has manifested. Given the range of things I tested it on--from material objects (large and small), to money, to health, to (don't laugh) the weather--this defies probability, since I would have expected at least *one* small success. Vitale is a good promoter, and I honestly expected some results--from a heightened level of positive thinking, if nothing else--but given my experience with this, the author's tales of "miracles" seem to me now little more than wild hype. In any case, there are better books on the same subject: *Shortcut to a Miracle*, and *Professional Dreamer* are two (no, I have not enjoyed significant results with those techniques, either, but I think they are better book nevertheless).=====This is the second review I wrote for this book. The last one mysteriously disappeared shortly after I posted it. There was nothing inappropriate in it--no foul language, no references to other

reviews--but I did take strong umbrage at the author's persistent and transparent marketing of his cronies' goods and services. I haven't change my opinion in that regard at all. It is extremely annoying to read a book--not a free book, either--and realize you are still being pitched. Okay, these aren't exactly pitches, more like plugs. But they occur repeatedly. And there is a list of e-mail addresses and URLs for these same people at the end of the book.
